Guide to the Use of This Index

This is an exhaustive index to the issues of the Philippine Journal of Public Administration (PJPA) from volumes 1-47 (1957-2003). It provides all possible access points to every article, document and book review published in the journal.

The first section, “Index to Authors of Articles,” gives complete citation for the article under the name of the author; co-authors of the article are listed, with cross references to the first author. It gives the volume, issue number (in parenthesis), page references and date.

The “Index to Titles of Articles” also gives complete citation under the title of article, with the name/s of the author/s, followed by the same citation format as the author index.

The “Index to Subjects of Articles” gives the keywords or subjects of the articles for easy reference. The articles, documents and book reviews as a whole – not just the titles or abstracts– were skimmed to determine the keywords or subjects used as entries or access points for the subject index.

The “Index to Book Reviews” is divided into three parts. Part I gives complete citations under the name of the author of the book; co-authors are also listed with cross references to the first author. The citation includes the title of the book and the name of the reviewer [in bracket]. Part II lists the books reviewed by title; while Part III gives complete citations of the books reviewed by the name of the reviewer.

Users of this index need to be aware that the pagination of each volume of the journal is continuous.
